

CMM242 Basic Web Design

Assignment 10

DETAILS:

Using your HTML and CSS pages from Assignment 9 add the following HTML and CSS

1. Add a link that scrolls to a part of the page from your header navigation
2. In the footer section add 3 more h3 element OR code out your footer design
 - a. Use CSS rules to make the 4 h3 elements sit horizontally and centered across the footer space to create 4 columns of type.
3. Create a second page that links back and forth to the first page
4. In the middle section, copy your div that holds the image h2 and p and paste 2 more copies OR code out your middle homepage section
 - a. Add the class attribute with the same value to each of the parent divs.
 - b. Use CSS rules to select the div with the class name you made in step 2 and apply rules to make the following happen.
 - i. Create a uniform background color
 - ii. Create uniform padding and margin spacing for each container
 - iii. Make the three containers sit horizontally on the page as 3 columns

*BONUS = add an element that sticks to a specific part of the page regardless of the user scrolling.

GRADING CRITERIA: Grades will be based on accuracy and neatness of your code and your ability to position div boxes. 0.5 points taken off per error, 1 point taken off per requirement missed, 0.5-1 points taken off per style issue, maximum points per assignment = 10

OBJECTIVES: Understand how to use div boxes.

SUBMISSION METHODS:

1. Open your folder named: *YourName_AssignmentCode* in the [Assignment Code Submission Folder](#)
2. Open your index.html file and add in new HTML as outlined above
3. Open your style.css file and add in new CSS as outlined above
4. Save and make sure to include any additional files needed to properly render your website
